PROFESSIONAL SUMMARY

Software Engineer with over 1 year of experience building scalable backend systems using Python, FastAPI, and MongoDB. Skilled in designing RESTful APIs, implementing secure authentication (JWT, AES-256), and optimizing services to handle 10K+ requests per minute. Proven track record in deploying real-time identity verification platforms at institutions like GD Goenka University and KJ Somaiya. Passionate about clean architecture, secure design, and building tech that solves real-world problems.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript

Frameworks: FastAPI, Django, Flask

Databases: MongoDB, PostgreSQL

DevOps & Tools: Docker, Git, Redis, Kafka, PowerBI, Tableau

Security: JWT, AES-256 Encryption, Bcrypt

Other: REST APIs, RBAC, OAuth2, API Rate Limiting

PROFESSIONAL EXPERIENCE

Verismart.ai, *Software Development Engineer 1*

03/2024 – Present | Gurgaon, Haryana

- Built and maintained core backend systems for DigiPass, a digital identity verification platform used at institutions like **GD Goenka University**, **KJ Somaiya**, and others.
- Designed scalable APIs (FastAPI + MongoDB) **to handle 10,000+ API requests per minute** during peak hours.
- Integrated Redis and Kafka for real-time event processing and tracking of user entries.
- Implemented secure login and verification workflows using **JWT, bcrypt, and AES-256 encryption**.
- Designed and enforced RBAC with audit logs for 100+ admins and event staff.
- Led development of **GDPR-compliant** consent management flows for sensitive biometric data.

Psyliq, *Data Analyst Intern*

01/2024 – 02/2024 | Remote

- Analyzed operational data using Pandas and NumPy to generate actionable insights.
- Wrote optimized SQL queries for extracting and transforming large datasets.
- Created PowerBI and Tableau dashboards to visualize performance metrics.
- Automated monthly reporting and collaborated with teams to optimize operational workflows.

PROJECTS

DigiPass, *Live Identity Verification Platform*

08/2024 – Present

- Designed and developed DigiPass backend to handle 100K+ verified user entries across live events.
- Built real-time face recognition + ID match verification workflows using FastAPI and MongoDB.
- Deployed at GD Goenka University, KJ Somaiya Institute, and multiple smart campus.
- Built analytics dashboards for organizers showing real-time participation, verification success, and fraud detection.
- Ensured data privacy via AES-256 encryption, GDPR consent handling, and API rate limiting for abuse prevention.

SnapNote, *Secure Self-Destructing Note Sharing*

03/2024 – 04/2024

- Developed a secure note-sharing platform with auto-expiring, tokenized one-time URLs using FastAPI.
- Used TTL and AES-256 encryption to ensure data privacy and one-time access.
- Added MFA and request rate-limiting to protect against brute force and abuse.
- Dockerized for fast deployment with clean, modular REST API structure.

EDUCATION

Chandigarh Group of Colleges,

B.Tech in Computer Science Engineering

08/2020 – 06/2024 | Landran, Punjab

CGPA: 7.63 / 10
